TV GUIDES
PREDICTIONS
F2 DX ON RISE

Compiled by John O. Broomall, Route 1, Broomall Trail, Waleska, GA 30183

PREDICTIONS - What do you believe will be the best dates in January, February, and March for Es and trops (assuming you are an optimist and believe DX will occur)? Use your past DXing records, lunar cycles, or hunches. List only one day per month for Es and one day for trops. I will compile and report in the **VUD.** Will the same date be listed by more than one DXer? Who will turn out to be the best predictor? Participate and then turn to the Feature column for results. TV and FM DXers are urged to join in. Remember only one date per month, per mode.

F2 IS ON THE RISE - According to the November **VUD**, the ultimate long distance reception, F2 is on the rise. PLEASE write if you have ever logged F2 or other DX in excess of 2,500 miles. Give details on equipment used to log audo or video of European or other non-American standard reception. Also, if you have DXed ham TV, let us know. Share with us your experiences!

NEW? WE ARE HAPPY TO WELCOME YOU!

The convention endorsed and encouraged extending the hand of friendship to new members. Let us hear from you with your comments, reports, and questions, even if you have only logged ten stations and don't know the difference between 75 ohm and 300 ohm antenna lead. If you would like a "pen pal" or a call from a nearby DXer, let us know! This column can be your "open forum."

MEET YOUR FELLOW MEMBERS

JOE COX, 4700 North Springs Court; Dunwoody, GA 30338 (404+ 393-2193h, 393-5300w), is a new member in the Atlanta area. He is an executive with Goldkist; one of his good friends is a Scientific Atlanta VP. Joe wants recommendations concerning a "good, professionally designed and installed outside system, with rotor." Joe lives in a 2½ story house on a hilltop and is interested "out of curiosity" to see what he can get, primarily stations within 200 miles. He is not motivated to "go for records" but is interested in local programming in fringe cities. (Joe, that may change if the DX bug really bites.) He would like to talk with or meet other members.

NICK LOMBARDI, 2203 Plaster Road NE, #N-1; Atlanta, GA 30345, simply can't get TV DX because of his downtown location and apartment restriction on outside antennas. He is primarily interested in FM DXing.

HELEN SWANSON, 1175-C Church Street; Decatur, GA 30030 (404+ 378-776), 876-0307w) is a brand new DXer and is "overwelmed with DX lingo and abbreviations." Helen is amazed at the wide range of special interest clubs represented in the Atlanta area. Her interests are in FM; equipment is limited to a Pioneer S-26 and a Radio Shack clock radio. To date, Nashville, TN, is her most distant logging. Membership in WTFDA was a gift from her boyfriend who is an AM DXer. She is a county Public Health Nurse and has lived in Decatur for 15 years.

NEXT MONTH look for an in-depth feature, with photos, on the world's leading TV DXer, Bob Seybold. Bob was interviewed at length at the 1987 convention. The feature will make fascinating reading — guess how many stations Bob logs daily in the winter even when DX is dead!

FROM THE THRILLING DAYS OF YESTER YEAR - BILL DRAEB TO THE RESCUE - Several readers of "TV DX 30 YEARS AGO" have asked about call letter/station changes through the years. Top DXer Bill Draeb, Kewaunee, WI, recognizes 90+ percent of the old calls from 30+ years ago. Below, the information before the / (slash mark) is old; the data after the slash is current. Write Bill if you have additional "history questions."

CMAB-2 Havanna/not use call. KLRJ-2/off. WAIQ-2 Andalusia AL/WAIQ-26 Montgomery (WDIQ-26 Dozier now on 2). WTWO-2 Bangor ME/WLBZ-2. WTWO-2 Bangor ME/Terre Haute. KBES-5/KOBI-5. CMQ-6 Havanna/no longer uses call. WSPD-6/WPSD-6. KOCA-7/KOAC-7. WPST-10/WTSP-10. KLAA-14/KARD-14. WBLN-15/off. WSYE-18/WETM-18. KDOG-26/KRIV-26. WTPA-27/WHTM-27. WTVM-28/WTVM-9 (28 is now WJSP). WBPZ-32/off. WCMB-71/WITF-33. WEEK-43/WEEK-25.

SPECIAL NOTE - Have you ordered your WTFDA T-shirt yet? Send $12 now to John Broomall while supplies last. **TV GUIDE** collectors - would you pay $30 for recent copies of all 106 TV GUIDE editions nationally? If so, contact John Broomall. (Fred McCormack is the proud owner now of a virtually complete set.)

SAVE ON 1988 CONVENTION! Five gets you ten. Send in a $5 nonrefundable deposit toward your 1988 registration by December 31, and we will credit your account with $10. Also, the early DXer gets the inside scoop on the convention. The **VUD** is not big enough for all the details, so "youall" write to hear about the Southern hospitality planned. If you can't come, but are interested in audio/video tapes, photographs or printed information, send in your $5.

WTFDA member Alain Pepin presents

A FRENCH DICTIONARY

adapted for FM and TV DXing in North America

First off, the familiar numerals...

88=Quatre-vingt-huit
89=Quatre-vingt-neuf
90=Quatre-vingt-dix
91=Quatre-vingt-onze
92=Quatre-vingt-douze
93=Quatre-vingt-treize
94=Quatre-vingt-quatorze
95=Quatre-vingt-quinze
96=Quatre-vingt-seize
97=Quatre-vingt-dix-sept
98=Quatre-vingt-dix-huit

99=Quatre-vingt-dix-neuf
100=Cent
101=Cent un
102=Cent deux
103=Cent trois
104=cent quatre
105=Cent cinq
106=Cent six
107=Cent sept
108=Cent huit

1=Un
2=Deux
3=Trois
4=Quatre
5=Cinq
6=Six
7=Sept
8=Huit
9=Neuf
10=Dix
11=Onze
12=Douze

13=Treize
14=Quatorze
15=Quinze
16=Seize
17=Dix-sept
18=Dix-Huit
19=Dix-neuf
20=Vingt
30=Trente
40=Quarante
50=Cinquante
60=Soixante

VIRGULE= FF for "comma", which is used instead of "point" in the metric system, thus 94.3 becomes "Quatre-vingt-quatorze virgule trois"

C'EST QUOI ? = Pron. "Sekwa": FF for "What is it?" (CKOI 96.9 Verdun)
C'EST FIN = FF for "It's nice" (CFIN 104.5 Coaticook)
C'EST FOU = Pron."Sefoo": FF "It's crazy" (CFOU 103.1 Ste.Thérèse,early days)
CÂBLE= Cable. Note the accent over the "A". Not necessary in capital letters.
CANAL= FF for "Channel".
CHAT = FF for "Cat", pron. "Shah". The type that meows. (CHAA 103.1 Longueuil)
CHEZ = FF for "the home of...", American snobby restaurants use the term also. Pronounciation "Chay" used by CHEZ 106.1 Ottawa, CHAI 101.9 Châteauguay
CHIC = Fashionable, well dressed, pretty. Used by CHIK 98.9 Québec (Dance mx)
CHOIX = Pron. "Shwah": FF for "Choice" (CHOI 98.1 Québec)
CHÔME = FF verb singular present tense "to be out of work" (CHOM 97.7 Montréal)
CIBLE = FF for "Target" (CIBL 104.5 Montreal)
CIEL = FF for "Heaven" (CIEL 98.5 Longueuil)
CIEUX = FF for "Heavens", plural of "ciel" (CIEU 94.9 Carleton)
CÎME = Pron. "Seem": FF for "Summit". CIME 99.5 Ste.Adèle (Easy listening)
CIMO = Pron. "C-Mo", no perticular meaning. 106.1 Magog (Dance Music)
CITÉ = FF for "City". 107.3 Montréal, CITE-FM-1 102.7 Sherbrooke. Watch for "Pour l'Amour de la Musique" slogan (MoR / Easy listening)
ICI = Pron. "E.C." FF for "Here" meaning "This is..." ("Ici Radio Québec")
M.F. = Modulation de Fréquence, used by extremist french stations instead of FM (Example: Ciel-MF 98.5)
N.T.R.= Abbr. "Nouvelles Télé Radio". News service and radio network. CIEL 98.5, CFEL 102.1, CJRG 94.3, CIME 99.5, carry their overnite EZL pgm
RADIO-CANADA= French CBC network. On test patterns, "MONTRÉAL" refers to CBFT relays, "QUÉBEC" CBVT relays.
RADIO-FUSION = Fusion between two radio stations: CJLA-FM 104.9 Lachute and CHPR-FM 102.1 Hawkesbury. Note "102.1 en Ontario et 104.9 au Québec" ID
RADIO NORD-JOLI = Transl. "Pretty North Radio", CFNJ 99.1 St.Gabriel.
RADIO-QUÉBEC= Québec government owned TV network. Check stations whose callsigns begin with "CIV-" (CIVM 17 Mtl, CIVQ 15 Québec, etc.)
SIROP = FF for Syrup. Check CIRO 99.7 St-Georges-de-Beauce (Le FM Country)
SUPER = Super. Used by Télé Quatre Saisons affiliates with the channel number. CFAP is "Super 2, Câble 13" in Quebec City.
TÉLÉ = Short for Television. Used by Pathonic TV owned stations: CHLT-TV Sherbrooke (Télé 7), CFCM Québec (Télé 4), CHEM Trois-Rivières (Télé 8) Look for "Un Amour de Télévision" slogan. Other stations possible...
T.Q.S.= Télévision Quatre Saisons. TV network headed by CFJP Ch.35 Montréal.
T.V.A.= Télédiffuseurs Associés. Flagship station CFTM 10 Mtl. Affiliates include most Pathonic stns (see TÉLÉ) plus CJPM Chicoutimi, CHOT Ottawa

REMEMBER that the letter "I" is pronounced like the English "E", "J" becomes like "G" and "G" sort of like "J". The letter "E" sounds like the "U" in the word "Burp".

The tropo season certainly turned out to be rather productive. The MS count/intensity appears a lot lower than last year (I wonder if this means next year's E-skip season will also be poorer?). 73's, Scott.

On September 3rd, I set out on a UHF-TV DXpedition to Cape Cod MA. I packed a 2" Sony Watchman, a Winegard PA-4975 amp, and a small UHF "dart" antenna. The amp and antenna were set up in my first-floor Hyannis Holiday Inn motel room. I received snow-free signals from over 400 miles away! Unfortunately, they were my locals and semi-locals from DC, MD, and Philly! I have noticed that low-noise, hi-gain UHF amps work great inside, even on loops!!

Experimenting with portable DX gear, I find the antenna design used on the Radio Shack U-100 and U-120 works well. These log-periodic/corner-reflector hybrids lack gain above channel 50. I wonder how a quad-stack of them would compare with a 7' dish? Of course, for indoor or portable use the quad-stack would perform better than the 7' dish. (Yeah, if ya got the room for it! I find the 4-bay to be about all I can handle in a studio apartment, especially since bigger antennas compete with my ceiling fan for air space!---jfc)

Morris Sorenson, 111 Town Line, Milton, Ontario L9T 2X1 (416) 878-5130

TV-DX has been almost non-existent here lately, so I can only make a small contribution to your column. On October 17 at 1655 via GW CIII-43 Toronto (Global TV Network) testing from CN Tower with color bar test pattern. Now on with regular programming. This transmitter will replace Global's ch. 22 xmtr in Uxbridge ON, although the latter will remain on for a few months. Distance is 25 miles. 73, Morris Sorenson. (Great! Another local is just what you wanted, right? I would imagine that if the CRTC is consistent, the calls for this one will be CIII43. I'm sure Bill or some Canadian members will correct me if I'm wrong!---jfc)

John F. Combs, 1308 Willow Branch #24, Jacksonville FL 32205 (904) 389-2451

NOVEMBER 10-15---At BAHIA HONDA STATE PARK FL: My long-awaited DXpedition to the Florida Keys was a profound disappointment. Oh, sure, it's a lovely place to camp and the weather was gorgeous, but DX-wise it was a flop. I did see very weak tropo or extended GW one evening as far as WFTV-9 Orlando (272 miles), but not a single Cuban TV signal made the 110-mile trip across the Straits of Florida...and monitoring Cuban TV was the main reason for the trip! Oh, well...maybe next year. Local TV at the park is provided by the Big Pine Key translators (which are actually on Lower Summerland Key, between Bahia Honda and Big Pine Key). Although the xltr site is only 2 miles away, the signals were not quite perfect due to the fact that the xltrs are directional toward Big Pine. A few of the Marathon xltrs were noted at very weak levels. The xltrs seem to be widely accepted and appreciated if one can judge from the scads of corner reflectors and 4-bays one sees sprouting from rooftops in non-cabled areas of the Keys. After the trip, back at the ranch:

NOVEMBER 1987				NOVEMBER 1987				NOVEMBER 1987

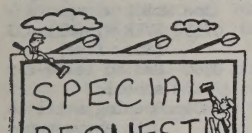
The MS logging of WRC-4 was a matter of being in the right place at the right time! I had just gotten home from work and noticed WJXT-4 signing off, as they do only for a few hours Saturday and Sunday AM. I decided to see if any Tr or extended GW might be logged on this normally blocked channel. I noted a very weak 3/4 cb pattern, then realized that the ID was WJXT Jacksonville (apparently testing with their dummy load, or exciter, or whatever one calls it). Suddenly, a weak but more than 1-second long burst clearly showed the WRC-TV call letters! This is the first MS IDed on the indoor quad-loops, and I'm now inspired to check the channel on the weekend of the Geminids meteor shower! Then on the 30th, lo and behold came E-skip! I hope there will be much more to come in December!

+-



Some of the frequencies I most enjoy monitoring on my scanner are those assigned to the Broadcast Media. These frequencies (in the 26, 161, 450, and 455 mHz areas) are used by radio and TV broadcasters for such things as newsgathering, remote feeds, STLs, IFBs, engineering, traffic reports, coordinating "live shots," and general 2-way communications. These assignments are not well-covered in the major scanner directories. I am asking those WTFDA members with scanners to search these frequencies and send me information on which are in use in your area. It may take a bit of monitoring to determine which stns are using which freqs. Please indicate the stn using the frequency, what it is used for, whether it is simplex, duplex, repeatered, etc. I hope to begin compiling a directory of these frequencies, and will credit those who provide information for it. Thanks---jfc

January 1988 Deadline: 2- 4-88

This month's column is about as short as it can get without disappearing. If there were any super trops to rival that of last Thanksgiving, no one rushed off any reports! There was some nice tropo that week, however.

0800 Had to leave for school
1804 Opening still in with above two +
1954 KRWF 43 MN 374

WWAT-53 doesn't get out well compared to most other stations in that area. WRGT-45 was snow free and WWAT-53 was still quite snowy. WYIN-56 and WMCC-23 were getting out well on the 15th.

On November 24 after 2000, KVRR-15 and KRWF-43 faded mostly, but KSAX-42 was pretty rock steady.

I looked for KBRR-10 and KNRR-12, but nothing that evening. Local WLUK-11 wipes out channels 10 and 12 pretty good in that direction so maybe they were there, but I didn't see them.

KVRR-15 and KSAX-42 should be good indicators of tropo openings in that direction. Hopefully, I'll be able to see something beyond them sometime soon.

There's somethng new going up in Green Bay. Last Thursday (November 18) on the way to school, I noticed another tower going up about 600 feet west of WXGZ-32's transmitter. The tower was about 800 feet high then, and I couldn't tell much more by looking at it from over 10 miles away, so on Friday after school I drove over there to see what's going on. The tower is right where I said it was and it isn't finished. The gin pole was still up there and there were about eight more sections of tower to go up yet. The cement block house for the transmitter is built, but no one was working on the site when I was there. The tower itself is a little different than WXGZ's or WGBA's which is 600 feet to the east of WXGZ's, both of which are identical (i.e., same manufacturer). This new one seems to be a little lighter gauge. There's been nothing in the newspaper about this. I wonder if someone is going to put the vacant channel 44 on there? I guess I'll have to wait and see. 73's for now.

Fred McCormack, 135 Prairiewood Drive, Fargo, ND 58103 CST

I was at work the 24th of November, but on the search antenna at my company's CATV headend I observed some of the tropo opening that Bill reported above. At 0744 the following were noted in a quick scan of the band: KTCI-17, WQOW-18, WXOW-19, KTMA-23, WLAX-25, WKOW-27, WHWC-28, KITN-29, WHLA-31, KXLI-41, KSAX-42, and KRWF-43. At 1044, KTIN-21 was noted from Iowa. At 1422, WHRM-20, WGBA-26, and WLEF-36 were noted from Wisconsin. I did not see ID's on all of these; they are educated assumptions.

From my own QTH, the following were seen on December 1: KXNE-19 NE (320 miles) at 1932, KSIN-27 IA (300) @ 1933, KHIN-36 IA (390) @ 1934, KPTM-42 NE (400) excellent @ 1935, and a unid Fox affiliate over KSIN-27 at 2021.

Deadline: 2/1/88 for the March 1988 column

-happy new year!-

January 1988

A LOOK AT WHAT'S NEWS FOLLOWS THE WEATHER:The snow that fell last night is already gone. Being December 5th,and already seeing measurable snow more than once,it looks as if this winter may be a bad one. (Or a good one,if you like winter.I do!) Anyway,it looks as if this column will be pretty short,as I have only one report. Maybe DX will pick up soon(Es on TV has occurred a couple of times.) and there will be lots of NWS DX to report! Well, on to the column...

Bill Kretschmer, 104 Kopp Avenue, North Syracuse,NY 13212-1066

I recently became a member of WTFDA. Besides yourself, I too am a NWS DX nut. (Let's hope we're not the only ones-the more the merrier!-mcs) I've logged many stations since 1983. I too have a bandscan from Syracuse to Chicago on Interstate 90 which I travel often. The following are received at the above address:

Syracuse,NY	WXL-31	162.550	Albany,NY	WXL-34	162.550
Buffalo,NY	KEB-98	162.550	Burlington,VT	KIB-60	162.400
Rochester,NY	KHA-53	162.400	Marlboro,VT	WXM-68	162.425
Elmira,NY	WXM-21	162.400	Windsor,VT	WXM-44	162.475
Binghamton,NY	WXL-38	162.475	Ottawa,ON	XLJ-696	162.400
Williamsport,PA	WXL-55	162.400	Toronto,ON	XMJ-225	162.475
Allentown,PA	WXL-39	162.400	Erie,PA	KEC-58	162.400

TROPO DX

Received Thanksgiving 1986:

Lafayette,IN WXK-74 162.475

My second tropo which I received on a whip car antenna at Fairhaven,NY on Lake Ontario was KHB-97 on 162.400 from Sandusky,OH. Fairhaven is 40 miles east of Rochester,NY. The NWS station there is KHA-53 on 162.400 MHz and is quite strong at Fairhaven. Sandusky weather-adio came in strong over Rochester for about an hour one Saturday morning shortly after sunrise.

The following is a list of stations received on Interstate 90 from Syracuse to Chicago: (This will take the place of the Spotlight State for this month. I've included the coordinates to the information that Bill provided.-mcs)

CITY	CALLS	FREQ.	POWER	LATITUDE	LONGITUDE	MSL	HAG	COMMENTS
SYRACUSE,NY	WXL-31	.550	1000	42.58'	76.12'	1450	140	
ELMIRA,NY	WXM-21	.400	1000	42.06'	76.52'	1956	250	←changed freq.
ROCHESTER,NY	KHA-53	.400	500	43.08'	77.35'	1093	350	from .550 to
BUFFALO,NY	KEB-98	.550	330	42.38'	78.46'	1740	300	.400 on July
ERIE,PA	KEC-58	.400	330	42.03'	80.00'	1970	570	14,1987.
CLEVELAND,OH	KHB-59	.550	500	41.24'	81.51'	1150	200	
AKRON,OH	KDO-94	.400	500	41.03'	81.35'	1760	672	
SANDUSKY,OH	KHB-97	.400	1000	41.24'	82.49'	965	335	
TOLEDO,OH	WXL-51	.550	100	41.37'	83.42'	1150	250	
DETROIT,MI	KEC-63	.550	330	42.28'	83.12'	1359	530	
FT. WAYNE,IN	WXJ-58	.550	1000	41.06'	85.21'	1103	260	
SOUTH BEND,IN	WXJ-57	.400	1000	41.36'	86.11'	1125	250	
CHICAGO,IL	KWO-39	.550	500	41.53'	87.38'	2057	1482	

Equipment for home use: Sony portable Air-8 scanner,5-element vertical yagi tuned to 162 MHz atop a 30' Rohn #25G tower at 44'AGL,Channel Master #1111 VHF at 40'AGL and Channel Master 7'UHF dish at 33'AGL.

Traveling to Chicago one can expect a sudden change in weather conditions,especially during the winter months. Those who live by the Great Lakes are too familiar with lake effect snow squalls and in summer,heavy thunderstorms with frequent wind damage and lightning discharges. Before traveling I listen to Rochester NWS for Buffalo radar reports and listen to WGR-550 or WKBW-1520 road reports. The trip I went on was in February,1987. An 11-hour trip took 14 hours due to blinding snow from Buffalo to Ashtabula,Ohio along Lake Erie. The second spot of snow squalls was on the Indiana Toll Road near South Bend. I listened to the South Bend NWS station to find out what to expect ahead, then the sound alarm was activated and I heard:"The National Weather Service office in South Bend has issued a snow squall warning for Porter and LaPorte counties in Indiana. Winds gusting 25-35 mph with heavy snow squalls and frequent 'white outs' may occur." I made it through the snowstorm and counted 5 tractor-trailer jackknifes and nearly a dozen stranded motorists. The total width of the snow band was about 20 miles wide and ended in Gary,just outside Chicago. The moon came out and the roadway was clear. The NWS station in Chicago didn't mention much of the bad weather I had encountered. They only said to expect light snow in northwest

(Bill's report continues on the next page...) CONTINUED

Indiana. FM reception was terrible in snow squalls. WKQX 101 and WFYR 103½ almost faded completely. Back in the Cleveland area on 162.400 MHz, Akron/Sandusky share this frequency and they were interfering with each other with an occasional 'squeel'. The same in northwestern Ohio where Toledo,Detroit,and Fort Wayne share 162.550 MHz. My next report will be NWS,TV,FM DX atop Mt.Washington,NH. I am purchasing a Channel Master trap for WMTW-8 which transmits atop the mountain, 100 feet from the parking lot where I DX from my car. 73's Bill.

Thanks to Bill for the great (and only) report this month! I've heard that Syracuse is a pretty good place to DX from (although I found it to be even better up near Watertown) and it sure looks like it from the long list of regulars Bill receives. Can anyone top that? If you can or can't,send it in! And now,a report from me!

Equipment: Bearcat 210XLT scanner,Channel Master 5094 Monitenna at 32'AGL(1451'MSL), whip antenna included with scanner,Radio Shack Realistic weatheradio 12-151A.

Well,I knew that it was about time to get a scanner when I realized that Thanksgiving was coming up and in case the tropofest returns,I want to get some NWS DX out of it! Really,ever since the start of this column I knew I needed something better than a portable weatheradio to log NWS DX like everyone else who reports to this column. So,on 11/22/87, enter the new scanner into the picture. As soon as I turned it on,I went straight for the "wx"button,and I was to say the least elated when I heard Knoxville rolling right in! Suddenly I had 50% more NWS than before! Then,I realized that I was certainly going to need a good antenna if I wanted some good reception. Then,on a tip from Bill Nollman on the Monitenna being a good antenna(thanks,Bill!),I called the CM HQ's and they said that there was a dealer in Gray,about 5 miles away-right under my nose! I then promptly went out to Dixie Electronics,which turned out to be a wholesale dealer! Oh,no! But,they said that they would sell it to me anyway. So on 11/26 up goes the antenna and down go the hopes. I even had a big countdown and a tape recording of the festivities,expecting NWS stations to start pouring in and interfering with each other like Bill Kretschmer's area. I was crushed to hear WXK-46 about half as good as it is with the whip. Then,on 11/27,I adjusted the antenna to point west-northwest,where it appeared to come in best. Well,it doesn't come in as well as the whip,but who cares? When I logged DX on it I could care less! For example,with KIH-40,with the whip in it was WXK-46 as normal. But with the antenna hooked in-there it was,weak and very hard to hear but still there! Then it came in stronger just long enough to hear "Kentucky" and later "KIH-40"-yay! So if I want to hear regular NWS on WXK-46 I hook the whip up,but for DX its the Monitenna! I just leave the Monitenna in usually. (Monitenna looks a lot like Montana,doesn't it?) So,now,I'm up to 5 stations total. I love it! 3 local stations to listen to! WXL-56 on 162.40 from Asheville and the ever-present local WXK-47 on 162.55 are so strong that I doubt I'll ever get any DX through either. But,if they ever go off the air-for any reason-I'm ready! So now I hope to report like everyone else-finally! Now the editor can DX NWS also!

I plan to record all the DX I receive,so maybe I'll have an NWS DX tape sometime! And now,here's the story I promised you last time on "Just press for NWS".

Have you ever stopped at a rest area on an interstate and seen a button that says "Push Button for Weather Information"?(unless the same dastardly villain who always scratches the"-on"off the word"button"on the hand dryers in restrooms has vandalized the sign!) Well,if you press,like I always do,you'll get the nearest NWS station booming to you on a large speaker for all to hear! (I must admit I press it over and over again to keep it continuous for all to hear) I've noticed them in North Carolina,South Carolina,and Pennsylvania,and I think some other places that I can't recall at the present. If you've seen some of them in your travels,please send them in. If possible,please send the location of the rest area and what weather station you can hear there.

OTHER NWS NOTES:The ID TAPE II is still available,see the November VUD for how to get it. Also,if anybody can record their local NWS's for me,please let me know. I'll supply the tape and postage,all you have to do is record them! If you can,please get in touch. If you'd like,I can record some of my NWS's in exchange for yours, if you'd like to trade. The I-40 bandscan I promised awhile back may appear next time,depending on if there's space for it,as the entire bandscan is pretty long. If not,I'm thinking of putting it in monthly installments,and printing a little bit at a time. That's probably what I'll end up doing anyway,as it would probably take up a few pages for all of it! 73's Matt

NEXT TIME:Part 1 of the I-40 bandscan,and hopefully something from YOU!

OR Baker KJVS *91.1
OR Beaverton K296BE 107.1, it "went off the air for good Nov. 5th. A reason was not given"
OR Newport KEWP *90.9—this station, KJVS and KPAB, all had their applications dismissed for extensions of construction permits
TN Antioch W269AE 101.7 (replaced by W269AX 101.7 Nashville, a WQZQ 102.3 Dickson TN translator)
TX Granbury KFIL 106.7, application denied for extension; c-p cancelled
TX Kerrville K221BJ 92.1, caused by new KLLS there (see "Call Letters," above)
VA Fredericksburg WWWH *89.7, "application denied for extension; c-p cancelled"
WY Rawlins K216AS *91.1, served by K206AJ *89.1 Sinclair

Multi-City Identifications—Selected ones only; for more detail, see this feature in last month's FMedia! (subcription to which is $18/year from "FM Atlas," Adolph MN 55701-0024)

CA Pasadena KROQ-FM 106.7 with Los Angeles
CA San Francisco KIOI 101.3 with San Jose-Oakland; but "often uses cockeyed ID, 'KIOI San Jose-Oakland-San Francisco' "
CA Santa Monica KSRF 103.1 with Beverly Hills
IN Danville WGRT-FM 107.1, no longer IDs

with Indianapolis, k, $, "but they certainly sign off early. Don't know when they sign off, but at 8:30 p. m. two nights in a row they've been off."
MO Ferguson KCFV *89.5 with St. Louis

NonIDs, Not Just Slogans

CA Anaheim KEZY 95.9 no nonID, now "95.9 KEZY" [ID with Menlo Park
CA Atherton KCEA *89.1 K-Sea (strict);/
CA Fremont KOHL *89.3 no nonID, uses lots of jingles, like "89.3-KOHL Fremont"
CA Grover City KOSZ 107.1 Cozy.
CA Hollister KHIP no more "K-Hip" nonID
CA Los Angeles KIQQ 100.3 K-100 (not "K-Lite")
CA Monte Rio KMGG 97.7 Classic Rock
CA San Francisco KOIT-FM 96.5 Koit; ID with Oakland-San Jose
KKSF 103.7 103.7-FM (strict)
KMEL 106.1 All Hit 106, ID with San Jose
KEAR *106.9 Family Radio (strict)
CA Santa Clara KARA 105.7 Kara (strict)
CA Stockton KJAX 99.3 K-Jax
CA Walnut Creek KKIS-FM 92.1 Kiss (strict)
GA Forsyth WFXM-FM 100.1 Foxy
IL Des Plaines-Chicago WTWV 106.7 The Wave (strict), mj
KS Leavenworth KCWV 98.9 The Wave
ME Portland WWGT-FM 97.9 G-96
MI Dearborn WNIC 100.3 no nonID (was "FM-100"), now says, "100.3, WNIC"
MI Detroit WGPR 107.5 G-107.5 or just "107.5" (strict; calls used only once per hour)
NM Alamogordo KYEE 94.3 Key
NY New York WPIX-FM 101.9 Express-102
PA Philadelphia WIOQ 102.1 Solid Gold 102, r (oldies)
SD Rapid City KPHR 93.9 Power, r, "CHR"
TX Denton-Dallas KOAI 106.1 The Oasis
PR Guayama WSRA 106.9 Sonorama 107, salsa/latin pop
ON Windsor CKLW-FM 93.9 no "FM-94" nonID; now uses exact frequency
PQ Drummondville CJDM 92.1 now IDs by call sign, rather than only "FM Quatre-Vingt-Douze" (FM-92), in response to a reader's plea to the station that they use calls. He pointed out to them how phenetically similar their slogan was to CJMF 93.3 Quebec, "FM Quatre-Vingt-Treize," which is also heard in Drummondville.
PQ Ste-Therese CFOU 103.1 FM Cent Trois (FM-103). This nonID is very strict (calls not used). "Their studios have been spotted at a former toll gate on the Laurentians Autoroute (15), with 'FM 103' sign."

FMistakes, 10th ed. FM Atlas

AL Florence delete listing, p. 30 map for "92.7 WJBB"
TN Knoxville WIVK 107.7 not on p. 39 map

AM Happenings Most Likely Caused by FM

FCC delays announcing a standard for AM stereo, with the Commission reportedly deciding the "market demand for AM stereo just isn't there." This was seen as the "last remaining obstacle to giving stations a clear path down the road to conversion."
See other examples in FMedia!

SCSignals, 57-92 kHz

Including a complete listing of DiversiCom's Cue Paging at 57 kHz, with data noise heard and carriers on all the time; takes careful tuning of an SCS adapter to differentiate this from a 67 kHz signal that may also be present on a station (coded TD). This feature appeared in the December, 1987, FMedia!

More Small Print Happenings and FM Industry News
(partially reprinted from December's FMedia!)

FCC staff upholds denial of Gerry Turro's request for waiver of rules to allow his W276AQ 103.1 Fort Lee NJ to originate programming, including commercials.

ABC Talkradio to offer late-night call-in show devoted to DXing, including FM and subcarriers. I'll be a guest the first hour of the show, 3 to 4 Eastern Time, the early hours of Jan. 9, 1988. Stations carrying the Ray Briem Show include WSB 750 Atlanta, WABC 770 New York, KOA 850 Denver, KABC 790 Los Angeles. This is the third such program scheduled in as many years. Technical arrangements are by Greg Hardison.

Religious broadcaster hit with a petition to deny. Dick Snavely, WCIK 98.3 Bath NY, complains in "Religious Broadcasting" magazine that he filed for *90.3 in Elmira NY, and that a petition to deny was filed, questioning "if any organization with religious purpose can be an educational organization, thereby making it ineligible to operate on a reserved channel. We believe this could have far reaching consequences for many of our members. We have three other applications for new non-commercial FM stations, so you can be assured that we will take any necessary action to have the 'petition to deny' thrown out."

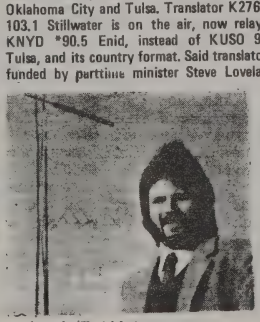
In move that could help DXers identify stations, the NAB advising stations to ID their frequencies properly. Since many radios are now electronically-tuned or "digital," NAB advises not to promote as "Power 105" or "AM 70," but to use exact frequency, such as many stations in Detroit are doing (see above, "NonIDs"). "NAB suggests you employ specific frequency references with many, if not all, your IDs. For example, in an informal ID, you could add a qualifier, 'This is Power 105—at 105.1 on your FM dial'. For hourly IDs, you may wish to add, although optional, your exact frequency."

Other features are found in this section of FMedia! including an editorial on public broadcasting funding, and "FMX Revisited: Has it Been Improved?" (a special report based on the latest tests), and then there's FM Forum. However, we'll continue with

Readers' Reports

Here are reports and comments covering both this month and last month. Norval Pagenhardt says he needs an FM Atlas real badly, and sorry that I cannot comply. The 1988 edition should be done and ready to send to the printers, hopefully by the time you read this, but it is too early to ask for advance orders. Norval and Hank Holbrook concur that 1987 was poor for skip—at least in eastern Maryland.

Danny Buntin sent an article about KOSU *91.7 Stillwater wanting to build a 305-meter antenna near Stillwater, but tall enough to "more than triple our coverage," including both Oklahoma City and Tulsa. Translator K276CM 103.1 Stillwater is on the air, now relaying KNYD *90.5 Enid, instead of KUSO 98.5 Tulsa, and its country format. Said translator is funded by parttime minister Steve Loveland, who has a background in public and top 40 radio. "There are a lot of hurting people who need to hear God loves them and that there's another way to succeed in life," said Loveland, who believes radio is a good vehicle for such a message.



Loveland at his tower

Mike Reid says CFBK (FM) 105.5 Huntsville ON started in June, and that CFBK AM was to have deleted Dec. 31. "They had a periodic insert about this that said 'don't worry; you may be surprised to find that even inexpensive radios today have FM'. CKLP 103.3 Parry Sound (ex CFBQ 1340) was a CFBK repeater when on AM. Not now."

Alain Pepin sent much PQ news, as well as news from his travels. He has compiled an interesting and quite professionally edited tape of his travels to the WTFDA convention, including a westward stop at Lincoln NE. All loggings are typed, and even include a bloopers section. He'd probably sell you a copy, or trade it for another tape, if you write him at 234 rue Montcalm, St-Jean-sur-Richelieu PQ J3B 3NB CANADA; (514) 346-4625. NonIDs, etc. that I picked off that tape will be in next month's VUD. Alain says "CKOI 96.9 Verdun PQ is still giving lots of impressive IDs with its 'C'est Quoi' jingles. Always 'CKOI 96.9 FM Montreal'. Still French and English contemporary hits. Studio is in Verdun."

Dave Sinclair: "Referring to page 6 of November's VUD, second to last paragraph; I am glad that the Showgun antenna brochures were taken [at the WTFDA convention in Esko], and I hope they were of interest." He sent an article on how the CBC wants to "apply immediately for an FM transmitter" in Victoria BC. Budget and technical constraints made the move impossible until now, but CKKQ 92.1, as reported above, fears possible usurpation by the CBC of its frequency. CKKQ will fight any possible move. "Cars have been painted, letterheads printed and all promotion has been geared to the call sign [sic] Q-92."

John Jefferson sent in more updatings, as the result of the trip he took, driving to the convention in Esko. He says KRKC-FM 102.1 King City CA expects to be on in February. "The KSTN-FM 107.3 Stockton $ mystery is solved. I am informed by FCC personnel that KSTN-FM was using a 19 kHz tone as some sort of signal that there had been an outage. That's why the phony $ showed up only after power failures! They have been informed that it's illegal to do that, so should have no more stereophony episodes. Still mono are KBBF 89.1 Santa Rosa and KKUP 91.5 Cupertino, as well as KSTN-FM.

"KRNO 106.9 Reno is now on Slide Mtn., with KIIQ-FM 104.5, KOLQ-8 and KREN-27, as well as KHZQ 96.5 Tahoe City and KHTZ 103.7 Carnelian Bay. They have about 37 kw, according to station personnel. Their signal is vastly improved in much of CA, as 9600' Slide Mtn. gives a much better shot to the west than 7600' Mt. McClelland. They should get out well to the east, as well, as 840-watt KRZQ was heard easily east of Battle Mtn. (at 180 miles) last July. KOSZ 107.1 Grover City should be on 107.3 this month. The owner, Rod Funston, is a one-time DXer, and we had quite a talk. . . It's unconfirmed, but I heard what seemed to be KVIK 91.5 Travis AFB one morning, just as I had to leave for work. Maybe it lives. KSFH 90.5 Mtn. View is definitely alive, though mono; I've heard it twice already this school year. I contacted one of the people behind KADV 90.5 Modesto, and there's no air date yet. He was under the impression the transmitter would be somewhere in town."

Mark Strickert offers to send along a current/updated LA FM station list, and I will share same after it arrives. I recently got a completed FM Dial History for Los Angeles and LA-

Suburban from Frank Drobny, as well as updatings for Portland OR and Baltimore-Washington. I checked through all of those, and added a few udpatings that I saw could be made, and did a dial guide for Chicago, which could see its initial publication here, if space permits. Other guides will be in FMedial Strickert, who "just rejoined WTFDA after 7 years away," operates "Decalomania" from Box 355, Berkeley CA 94701. It is a group interested in radio station programming, promotion items offered by stations, and members like to swap air check tapes of each other's markets.

Bill Fahber refers to both WOGL 98.1 and WIOQ 102.1 blowing each other off the FM dials with oldies, says "WEGX (Eagle 106) is having a blast. They're getting all of WCAU-FM's old listeners. A later newspaper article which I did not get to save pointed out that Philadelphia cannot support four oldies stations. It expects WFIL AM (which uses a satellite-fed oldies network) to change. WIOQ is also expected to drop out (although it is currently running a lucrative contest: If the tenth caller can name the last ten songs when he hears a cue, he wins $1020). Daytime only WPGR plays a different breed of oldies: plenty of '50s street-corner style, common in Philadelphia, and rarely anything from the '70s." WIOQ was reportedly caught "off guard" by the oldies move by WOGL 98.1, having suffered from lack of progress in getting better ratings, being clawed in a tight battle by The Eagle-106.1. WCAU-FM (now WOGL) made the move not so much to improve ratings, as to fill a void in the market, and anticipates no d-j changes, while at WIOQ there will be "something of a bloodbath. Out will be 6 to 10 p. m. jock Michael Tozzi as well as Mindy Magid," who worked 10 p. m. to 2 a. m. Overall, however, the number of oldies jobs in the city, with four such stations, has increased. "Hey, we've suddenly got an oldies war," howled Harvey Holiday, d-j at WPGR AM-1540.

Wendell Ford helped answer one of Ralph Strobel's questions about translators. "The W201AE 88.1 translator of WBGL 91.7 Champaign that Ralph Strobel has been receiving in Muncie IN is located on the WXFM 99.3 Mount Zion IL tower, which is located on the west side of Decatur. . .It is run through a yagi type antenna beamed eastward to cover Decatur, so it goes toward Muncie also, with 8 or 9 watts Muncie's way." But Ralph still wonders what WSSR Springfield IL is doing on 88.3, and he wrote WSSR, but no answer so far. Bruce Quinn suggests that Ralph may be getting an intermod product, or "phantom signal." Andy Bolin sent Ralph a legal ad for an application for 101.3A at Mattoon IL, filed by WKDJ, Inc. WWWO 93.5 Hartford City has gone to full Class A power and serving Anderson very well, and with offices or studios in Muncie. Ralph laments, "No DX here in months." Then, "I asked my winter quarter music appreciation class today how many sometimes listened to the AM radio band. I was surprised! Out of 25 students, three raised their hands. Usually none, as was the case in the previous classes."

Wendell Ford sent this logo for WVUR *95.1 Valparaiso IN, a 10-watter

WVUR-FM

THE SOURCE 95

VALPARAISO

Valparaiso's Favorite Music Station.

that gets out fairly well.

Pat Dyer: "No sooner did the Aug. VUD arrive with that 94.3 translator listed for Devine's 92.1 than the d— thing came on the air. It's about 10 times as strong as that one on 95.3, and appears to be designed to cover the west side of town (ID with 'Westplex'). While 94.3 had not been as useful in recent years years with Floresville and Kerrville on, I still had been able to manage a rare catch over them now and then. Not much chance now. The phone book has a local listeing for the Floresville station (KWCB), so I don't know how they like the intrusion of a translator on their frequency! (Maybe they should get one on 92.1!). Fred Laun will be permanently out of Nicaragua Nov. 7 (we'd expected him to be there until next summer). At least he was able to give us an idea of what the FM Es is like down there. 100.3 here now k (calls now KCYY); managed to chase off all the rock fans by running about three days of nothing but a cheap-sounding computerized voice doing a numerical countdown!" In a later letter, Pat writes:

"That phone number [in the San Antonio book for KWCB 94.3 Floresville] never seems to have anyone at it to answer! As I last remember them, they went to Spanish programming at night, with k during the day. I can't recall for sure if they were mono or stereo. That 94.3 translator is highly automated, since when Devine is off early Monday mornings, the tropo signals from New Braunfels or Kenedy will often suddenly turn the thing on (until they fade below its receiver threshhold). . . For all my griping about local 97.3, it did go off briefly (for a few hours) one early a. m. in October. I'm pretty sure that the Spanish that I got there then had to be Monterrey. Any hints as to when the next FM Atlas might become available? [No, see previous page, at the beginning of "Readers' Reports"—b.e.] Pat sent an article on how KSTX, an unbuilt public station on 89.1, may merge with c-formatted KPAC *90.9. KPAC would get more power, and KSTX would come on with more talk and NPR stuff. Article he sent was 1½ years old, and is the latest he has seen on the situation. He also sent his computerized log of FM stations received from MN, with WKLK-FM 100.9 Cloquet, where I work, received July 21, 1977, along with his impressive state and national FM reception statistics.

Bill Fait has logged the new WDON 104.9 Geneva OH in stereo, with ID saying "Geneva-Madison." They "often boast that they serve weird, esoteric places like Conneaut, Parkman, Rome, Mesopotamia and Ashtabula. I heard them claim to serve Gates Mills, then I went there to see if I could hear them on the car radio, and could not get them at all there and heard only WZLE [Lorain OH]. Advertisers on the station are from Mentor, Madison, Geneva, Saybrook and Ashtabula. I had the day off from work one day and drove all around listening to WDON in the car. I drove Ohio route 84 from Painesville to Madison, and the station was loud and clear. I drove through the Geneva area on state routes 531, 534 and 307 and got excellent reception. Sometimes when I listen to WDON in Painesville during tropo openings there is slight interference from WZLE. I work in Cleveland, and tune to 104.9 while driving to work. It sounds fine in Painesville and Mentor, but anywhere west of Mentor, forget it! You get a picket-fence effect, where the radio cuts back and forth between WDON and WZLE. Last week, I drove the new Interstate 480 from Olmsted Falls to Warrensville Heights, tuned to 104.9, and heard only WZLE, with no trace of WDON. Going north on I-271 to Willoughby Hills, I heard mostly WZLE, with slight interference from WDON. East of state route 306 on I-90, it was all WDON, with no trace of WZLE, 'Victory-105'. . . One thing I don't like about WDON is the way they cut songs off when they run more than five minutes. They did it with 'Summer' by War and with 'American Pie' by Don McLean, but they let 'Lying Eyes' by the Eagles play all the way through. Why? You may quote me in your newsletter. I would appreciate it if you would mention my name so I get credit for it. Please also remember that the opinions and observations expressed here are my own and do not necessarily reflect the views of WZLE, "WDON" or the WTFDA.

"Now it's Eric Bueneman's turn. It seems that I have had a larger 'margin of error' in my AM-FM estimate; 37% of all St. Louisans listen to AM radio, according to my estimates from the rating services, but it could be higher now, as KMOX-1120 posted a 25.2 rating, up from a 23.0! The secret of KMOX's success seems to be programming AT their audience, not TO their audience, as seems to be the practice on FM. KMOX has switched to Stereo operations, utilizing the Motorola system, my experience with AM $ is that it is really 'FM with AM characteristics'. As for the clearing up of the mess on AM and FM, the extension of the AM band to 1705 kHz, in my opinion, is only a short-term solution. The long-term solution is reallocation of the 2300-2500 kHz, 3200-3400 kHz and 225-240 mz bands to broadcasting. As far as 2300-2500 kHz and 3200-3400 kHz goes, the 2500 and 3330 kHz frequencies should be set aside for time and frequency stations WWV/WWVH (2500 kHz) and CHU (3330 kHz). Maximum powers that should be allowed on these proposed bands are 25 kw on the 2300-2500 kHz (AM2) and 3200-3400 kHz (AM3), 50 kw for WWV/WWVH and CHU, and 300 kw for 225-240 mz (FM2). Ownership regulations should be that no one company can own an AM, AM2, AM3, FM and FM2 station in the same market." AM-FM combinations would be legal. "Modulation standards should be 125% for FM2, and for AM2 and AM3, 90% by day and 85% by night. As for receiver manufacturing, the same quality should be put into FM and AM circuitry, like the audiophile circuitry found in the Carver TX-11a AM stereo/FM stereo receiver. All bands should be continuously tuned in stereo. As far as stations added goes, thousands of new stations could be added, while hundreds of AM and FM assignments could be eliminated. I suggest all WTFDAers should write the FCC and mention this proposal, and send a photocopy of your letter to the ITU in Geneva, Switzerland. Your letter can make a difference."

Offering a somewhat different viewpoint on AM-FM (and I am not endorsing either proposal) is Robert Grant, who spoke at the WTFDA:

"Some of the readers' comments in your column recently have grabbed my attention. I think Roger Winsor either sent you a very old Arbitron list, or pulled a fast one on you (about distant AMs being in the Chicago ratings). WBT is very difficult to hear in Chicago, even by a DXer. WBT beams northeastward at night to protect the skywave signal of KFAB Omaha, nulling out the midwest. KMOX St. Louis on adjacent certainly wouldn't help, either. . . Alan Almond now at WOMC 104.3 Detroit and almost nobody listens any more (being at four stations at one time or another can do that!)." WCZY-FM 95.5 will be WCZY, with the sale expected soon of WCZY AM. The sale of the AM 1500 should be categorized under 'AM Changes most likely caused by lack of available FM spectrum space'. Their first several weeks, as the (pardon my pun) 'born again WLQV' were sad, low budget Christian talk programs from a Washington-based network over a low-quality satellite link. The programming was full of sudden voice over IDs and long pauses with touch tones between programs. They sound much better now, but will probably never again compete with WEXL (AM 1340) and WMUZ (FM 103.5). The two-year gap as WCZY with top 40 will probably hurt forever, since the success of WCXI caused WDEE to give up the ghost on country, AM 1500 has been a museum of lost opportunities (they could have been a leading oldies station, a more powerful WCHB, they would still be a significant religioius station if only Gannett would have sold out before changing the AM to WCZY and simulcasting). Is Detroit now the only major market without any simulcasting? I remember

my stopover in Minneapolis (from the WTFDA convention), hearing the best-sounding AM, 980-WAYL, simulcasting the FM and IDing only as 'FM-94.'

"As for allowing U.S. AM stations to use European modulation standards, as suggested by Eric Bueneman: AMs in the U.S. are ALREADY ALLOWED to use less than 100% modualtion. They don't because then one station could be the loudest by going back to 100%! American radio also suffers from the effect of harsh audio processors 'needed' to 'stay competitively loud'. In European radio, there is no competition, and thus there are no harsh processors. I don't think that lousy audio is a necessary evil of competition, and I think that when all stations are the same 100% square wave buzz, the stations will agree to standardize on the same, clean processor, it is true that most transmitters distort primarily when in the range of more than 90% modulation, and that 85-90% modulation is often cleaner than 100%. A signal with 85% modulation is also less likely to be distored by a diode-detector receiver (that is, the type in general use) during a carrier fade, than a signal with 100% modulation. . . stations using C-Quam stereo are not supposed to exceed 85% negative modulation. I must strongly disagree that the 108-132 MFFM dial settings would be unusable [as Eric suggested], 'because people would think they were pirates in the VHF aviation band'." This is a poor reason because "the vast majority of listeners have never heard of any 'VHF Aviation Band', and anyone who would suspect such could grasp the dial-setting concept. The worst that could happen would be someone writing the FCC to report the 'pirates' and the FCC setting them straight. . . If MFFM is confusing to you, why don't you ask questions about it before negating it? I think that if I only said MFFM was 'to the listener, more FM stations at the top of the dial on newer radios, and for the AM broadcaster, the ability to start simulcasting on FM with a minimal investment and no new license for more 'spectrum' you would say my idea was 'too simple'. The technology for MFFM is already in use in stereo TV audio, color TV, AM stereo and cassette tapes. (The combination of these techniques, which are not mutually exclusive, is new). . . I hope that you will stop looking for the next 'problem' in MFFM and maybe support it, and take credit for helping inspire its creation through your criticisms of AM in your columns of the past four years. At least, I hope that the part of my lecture concerning the audio deficiencies of FM-SCA and NRSC-AM was well understood.

"I wish to thank you for holding a truly first-rate convention, and the wonderful E-skip you had catered in, and thanks to Carol and the three K's for their help with the convention." Enclosed were two 35-mm pictures taken of the convention, Stereo photography.

Frank Aden writes that KQPD Payette ID "is completely gone. I talked to the people who now have their old phone number, and they said the station was closed down 1½ years ago." To come back on the air as KORI-FM 100.3. KBSU *90.3 Boise applying to the FCC for translators in Magic Valley and atop Brundage Mountain in McCall. Station is also replacing its old 3,000 watt transmitter on Deer Point with a new one. KLCI 98.9 Nampa ID "is a mess, bad audio...They are in $, but not seem to be outputting a stereo separation to their transmitter, and may not even know how messed up it is." KMHD *89.1 Gresham OR has a a real oldies show, with Dan O'Keefe playing music back to the early 1900s. His "The Blue Room" is on 9 to 10 a.m. Saturdays.

Paul Gaines sent info on Detroit ratings. WJR still leads the pack, with WJLB 97.9 a distant second, then WJOI 97.1 and WHYT 96.3 tied with WWJ AM. Nick Lombardi sent an article on how Muzak is getting more contemporary—from the Oct. "Mix" magazine. He hopes I include DC in the FM Atlas map with DE and MD, and I think he and others will be pleased with how I handled the situation, taking no more pages. Tune in the 11th edition to find out how I did it! Nick writes: "I'm looking forward to seeing the new NC map, as the old one was getting quite crowded."

Eric Sundius sent info on the latest stations em' racing "New Wave" music (see "Formats").

Andy Smith (or is that his name?): "How about listing the live sports play-by-play networks?" No thanks—no time for that; I've got enough to do. Those interested can get the appropriate copies of the "Sporting News."

Dr. Ulrich Onken sent in several 10th ed. Atlas FM mistakes, all of which have been published in this column before. He did send some new information, and says he's in the WTFDA and a similar group in W. Germany, the UKW/TV-Arbeitskreis der AGDX. He says the 57 kHz ARI subcarrier is being changed in Europe to the newer RDS system, and I plan soon to include a coding (TH) for highway information at 57 kHz, once I get the complete listing from Blaupunkt or Technical Marketing Consultants, Valhalla NY. "In addition to the traffic message codes known from ARI, RDS will provide information on the program format, the program name and on alternative frequencies (for transmitter networks). In order to be compatible with ARI during a transition period, the digital RDS signals are modulated on the 57 kHz ARI carrier with a 90° phase shift to the ARI signals. As soon as ARI is dropped, RDS will work with a suppressed 57 kHz signal."

*WXRT Chicago started on 101.9, then after a hiatus, moved to 93.1 as WSBC-FM ("WCLM 101.9 was also licensed Chicago). Similarly, WMBI-FM started on the commercial frequency of 95.5, then left the air, returning later on 90.1. Other stations changing frequency were WOAK 98.3 Oak Park to 105.9, then to 98.7 as WFMT Chicago, WOPA-FM Oak Park moving from 102.3 to 102.7, WRSV 98.3 Skokie to 101.9. Also, WLFY-WXFM Elmwood Park from 107.1 to 105.9, and WBBM-FM from 97.1 to 96.3, after the demise of WBIK 96.3. WBIK was a casualty of the ABC-Paramount Theatres merger. Since ABC owned WENR-FM, and the theater group WBIK, one of the licenses had to be surrendered. In those days, you didn't sell FM stations—you turned the license into the FCC, and the call letters were deleted. The major growth in Chicago FM occurred between 1954 and 1961, with all but one of the high-powered, Chicago-licensed facilities occupied by the latter date. . . WFJL *93.1, owned by Lewis Institute of Technology, was an early experiment in public radio. I remember it for its live high-fidelity outdoor broadcasts of concerts from Grant Park.

Footnote references to cities: 1) Joliet IL; 2) Hammond IN; 3) Woodstock IL; 4) Waukegan IL; 5) Arlington Heights IL; 6) Michigan City IN; 7) Elgin IL; 8) Chicago Heights IL; 9) Aurora IL 10) La Porte IN; 11) Oak Park IL); 12) Skokie IL; 13) Crest Hill IL; 14) Des Plaines IL; 15) Highland Park IL; 16) Crete IL; 17) Crown Point IN; 18) Evanston IL; 19) Valparaiso IN; 20) Elmwood Park IL; 21) Lansing IL; 22) LaGrange IL; 23) Blue Island IL; 24) St. Charles IL; 25) Dundee IL. Sources for above: White's Radio Logs, 1949-1954; Vane Jones' North American Radio-TV Station Guide, 1961-1975; FM Atlas, 1972-1986, plus personal log books from having received many of the stations in the Duluth MN area.

Note: Only principal educational stations (88.1-91.9 mz) listed. (This dial guide edited for space reasons.)

Your help in pointing out any errors or omissions from the above will be appreciated. Dial histories needed from many other major markets, including Minneapolis-St. Paul, New Orleans, San Francisco, Boston, Seattle, Miami, Jacksonville, Milwaukee. They are fun to do if you have the resources to do one, and the time. The Chicago guide took me about five hours—researching time and computer formatting time. 73 Bruce

SATELLITE NEWS

George W. Jensen
4604 ANNTANA AVENUE
BALTIMORE, MARYLAND
21206-4220

A fairly small column this month - not too much going on.
First - MORELOS 1

The San Diego/Tijuana Relay seems to have ceased operation recently.
XPDR 12 - carries increasing numbers of feeds - also similar items noted on XPDRs 6 and 16 and 17.

C S S - CARIBBEAN SUPER STATION on Westar 5 - XPDR 23 - note received -they are relocating in Aruba and will return to the air upon completion. They are planning to offer stock options to help raise funds for the continuance of operation.

Showtime West is now on Galaxy 1 at XPDR 16
Its Satcom 3 feed was noted recently free and in the clear - somebody goofed.
Almost all of the Viacom Feeds from the Satcoms (3 & 4) should now be exclusively on Galaxy 3.

American Movie Classics on Satcom 4 XPDR 10 is now VC II scrambled and not as yet available to the TVRO audience.

PLAYBOY will scramble in about 6 months with VC II and will be available through the VIACOM Package at $60.00 per year - or $120.00 by itself.

SelecTV will soon be exclusively on Spacenet 2 - XPDR 3.
WESTAR 3 - Has somewhat regular News service from WTN/BBC/etc. in the PAL system. While I have a multi-standard system which permits reception of PAL and SECAM - The satellite receiver does not tune the colorburst frequency for these systems. I DO receive a stable solid picture, but in B&W. The same is true of Argentina on Intelsat at 53 W - but they use a different PAL format. These feeds have also been noted on Westar 4 & 5. generally between 5 & 7 PM/

Country Music Television is moving to Galaxy 1 XPDR 13 on December 15 and will simulcast on Telstar 3 until Dec. 31.

PBS is testing VC II on XPDR 23 with an authorization? code of UA - one I haven't seen before. Others noted on other services are FA/SA/SB/SM etc.

TV Sat - West Germany DBS has failed to deploy solar array and may be a bust.
There are delays being encountered in the Arianspace launch schedule - G-Star will not go until at least the end of January - with Spacenet 3 also being held back.

That's all for now - see you in 30.....,'73's

The Electronic Communications Privacy Act; the legality of DX'ing
036 WTFDA CLUB STANDARDS - 46 Jly 87 (1)
Guidelines for computing DX distance records and scoreboard totals

TECHNICAL TOPICS

092 THE NATURE OF DX, PART 1 - McVey, 2 Feb 87 (5)
About the propagation of radio signals through the troposphere
093 THE NATURE OF DX, PART 2 - McVey, 30 Apr 87 (6)
How Tropo DX occurs
098 THE NATURE OF DX, PART 3 - McVey, 7 Nov 87 (5)
Tropospheric effects, path loss, fading, etc.

AND WITH THIS, the WTFDA Index and Reprint Service is complete from 1979 to 1987. The index originally appeared in the Dec. 86 VUD, pages 2-6. Anyone who wants a copy of the VUD index plus this update may get one by sending me a SASE. Any article listed in the Index may be reprinted on request. To get reprints, just write to me at the address below, and enclose five cents per page to cover copying and postage costs. The entries in this update are arranged as follows:

TITLE - Author, page number, Month, Year, (number of pages).

The three-digit number preceeding the title ranks the articles in chronological order.

The WTFDA is a GREAT CLUB with a lot of TALENT...the more you participate the better it gets. If you have ideas for technical articles you would like to write or see written, let me or HQ know. And if you have bought some DX equipment of any kind, be aware that the club would like to hear about it. If that new tuner is great, tell us its strengths; if it stinks, we would all like to avoid that model. Make use of the reprint service, as it is here to help you. Best wishes and Happy New Year!

Note

The Baltimore Radio Reading Service is a closed-circuit radio station for listeners who cannot see, hold a book or turn a page. Newspapers, books and magazines are read aloud by volunteers. The broadcasts can be heard on a special radio, which can be obtained on loan by writing Baltimore Radio Reading Service, 2901 Liberty Heights Ave., Baltimore 21215, or by calling 366-0990. Not a great DX month, though a improvement over last month. Nothing new logged, but seemed like there were many more opportunities this month. No Thanksgiving tropofest this year, although WRDU came in very strong and was heard in Boone, NC on 11/29 and Waynesboro, VA. Instead, a TV skipfest? Strange, but nice to see something in the way of DX. 73's & super DX to all.

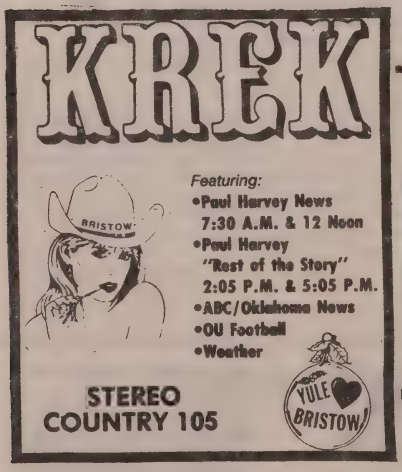
MORE, NEXT PAGE...



Ponca City's New Top Gun

John M. Jefferson, 4016 Crest Court, Pleasanton, CA 94566

Time for another report. The post-season has had a few gems to combat the ES withdrawal symptoms. After going without a MS logging until late July, I'm up to 5. In all, 66 for the year to match the '81 total. If December gets hot, I might even match '80's 72. The alltime best, 91 in '77, would appear safe from attack. As usual, underlined are new to the bay area, # means the older MR80 was used with the Winegard at 15' (else with MR80 #2 on the SW-Probe, which seems nearer to 60' than to 55' as previously estimated). * means logged with the Blaupunkt on Kirker Pass Road, which is in the Concord logging area (included as a bay area, but not as a Pleasanton, logging).

That's it for now. Rather brief compared with the last, but no complaints. KGIL has to be as improbable a catch as last July's WYAY Gainesville GA: they're in a deep valley with no hope for trops this direction (-130' sat), and seemingly too close for MS. It was a short burst, but easily readable & perfect timing. And a class A, at that (my 4th by MS).

A footnote to last summer's trip to the convention. During my overnight stop in Albert Lea MN I logged at least one station on every FM channel. Took me 20 years to manage that here (but I didn't have the Mack then).

Pat Dyer, 5315 Silvertip Dr., San Antonio, TX 78228
